PROFESSIONAL SUMMARY

Computer Science undergraduate at Saintgits College of Engineering (Autonomous), specializing in Artificial Intelligence, Machine Learning, Computer Vision, and Image Processing. Experienced in developing deep learning models using PyTorch, implementing knowledge distillation, and building AI and automation solutions through academic projects and industry internships. Interested in applying AI and intelligent systems to practical, real-world problems.

EDUCATION

B.Tech in Computer Science Engineering

Saintgits College of Engineering (Autonomous), Kottayam, Kerala

Expected March 2027

GPA 8.57 / 10 (until S6)

Honours in Machine Learning · Minor in Computational Mathematics & Applications · Micro Specialization in Data & Computer Communications

12th Grade — Science Stream (PCBM)

Sree Narayana Higher Secondary School, Kattingachira, Thrissur, Kerala

2021 – 2023

97.4%

10th Grade — CBSE

Santhinikethan Public School, IJK

2020 – 2021

92.8%

WORK EXPERIENCE

ML Research Intern

ONGOING

July 2025 – Present

Integrated Command & Control Unit (ICCC) — Saintgits College of Engineering × National Chung Cheng University

- Working on an AI-based smart-city traffic management initiative that combines Machine Learning and Computer Vision to build more intelligent traffic monitoring solutions.

AI & Automation Intern

COMPLETED

May – June 2026

Novox Edtech LLP

- Worked on practical AI and Generative AI solutions for educational technology, including automation workflows for the platform.
- Built and integrated an AI-powered chatbot into the Novox Edtech website.

Machine Learning Intern

COMPLETED

May – July 2025

Intel Unnati Industrial Training Program

- Developed a deep learning-based image deblurring system using a Residual U-Net architecture to restore details from blurred images.
- Applied knowledge distillation to train a compact student model under a larger teacher network, evaluating output quality using PSNR and SSIM.

— FEATURED PROJECTS —

Smart City Traffic Monitoring System

Built an AI-based smart-city traffic monitoring system using YOLOv8 for real-time vehicle detection and tracking. Applied computer vision techniques to analyze traffic flow, vehicle density, and congestion patterns to support more intelligent traffic monitoring solutions.

Machine Learning · Computer Vision · YOLOv8 · Python · Object Detection · Smart City Systems

Image Sharpening Using Knowledge Distillation

Built a teacher–student deep learning pipeline for image enhancement using PyTorch and knowledge distillation. Evaluated restored images using PSNR and SSIM while focusing on preserving important image details.

PyTorch · Python · Deep Learning · Computer Vision · Knowledge Distillation · Image Processing

LifeSync — Semi-Autonomous Task Prioritization & Rescheduling System

Designed an AI-powered life management platform combining intelligent task prioritization, adaptive scheduling, productivity management, budgeting, and wellness-oriented features, using n8n-based automation and AI/NLP processing for context-aware scheduling.

n8n · AI/ML · NLP · Automation · Adaptive Scheduling

— CORE SKILLS —

MACHINE LEARNING & AI

Machine Learning, Deep Learning, Computer Vision, Generative AI, Large Language Models (LLMs), Knowledge Distillation

FRAMEWORKS & LIBRARIES

PyTorch, Scikit-learn, OpenCV, NumPy, Pandas

AI & AUTOMATION

n8n, RAG, AI APIs, Workflow Automation

PROGRAMMING & DEVELOPMENT

Python, SQL, JavaScript, React, Git / GitHub, REST APIs

— CERTIFICATIONS —

- Machine Learning & Deep Learning — NPTEL
- Power BI for Business Professionals — SpringBoard Infosys
- Data Visualization using Power BI — SpringBoard Infosys
- Agile Scrum Certification — SpringBoard Infosys

— SOFT SKILLS —

Leadership Team Collaboration

Critical & Analytical Thinking Time Management

Problem Solving Research Mindset

Creative Problem Solving

— LEADERSHIP & EXTRACURRICULARS —

- **Media Head** — ACM Student Chapter
- **Marketing & Media Lead** — Open Source Club
- **Co-Head** — Drishya Film Club
- Coordinated **Ascend**, a National Level Hackathon
- Coordinated **Prayoga**, a State Level Inter-College Hackathon, for two consecutive years
